What is this product?

Type

The product is a share class of the Sub-fund Franklin US Treasury 0-1 Year UCITS ETF (the "Fund") which is part of the Franklin Templeton ICAV (the "Umbrella Fund"), an Irish collective asset-management vehicle constituted as an umbrella fund with segregated liability between Sub-Funds with registration number C167746 and authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011.

Term

The Fund has no maturity date. The Fund could be closed under the conditions laid down in the current prospectus of the Fund.

Objectives

Investment Objective

To provide exposure to short term US Treasury securities denominated in USD.

Investment Policy

The Fund invests in US Treasury notes and bonds as well as US Treasury bills that are included in the benchmark.

The Index, tracks the market for treasury bills, notes and bonds issued by the US government with at least one month and less than 12 months to maturity.

Derivatives and techniques The Fund may use derivatives for hedging, efficient portfolio management and investment purposes.

Strategy The investment manager seeks to minimise the difference between the Fund's performance and that of the benchmark (tracking error), regardless of whether the benchmark level rises or falls.

SFDR category Article 6 (does not promote environmental and/or social characteristics or have a sustainable investment objective under EU regulations).

Base currency US dollar (USD).

Benchmark(s) Bloomberg US Treasury Short hedged to MXN Index. Used for index tracking only.

The Fund is passively managed and seeks to replicate the benchmark by holding all of the Index securities in a similar proportion to their weighting in the benchmark. Its portfolio, and thus its performance, closely resemble that of the benchmark.

Share Class Policy

For accumulation shares, income from investments is reinvested in the Fund and reflected in the price of shares.

For this share class, a hedge is applied that is intended to minimize the currency risk between the currency of the share class (which is in a non-base currency) and the base currency of the Fund.

Buying and selling shares

You may buy or sell shares daily through a broker on the stock exchange where the shares are traded. Authorised participants, such as selected financial institutions, may buy or sell shares directly with the fund, on any day markets are open for business in the United Kingdom (provided that on such day the markets on which substantially all of the Fund's investments are traded are open).

Intended retail Investor

Investors who understand the risks of the Fund and plan to invest for at least 3 to 5 years. The Fund may appeal to investors who:

• have a medium risk profile and can tolerate moderate short-term changes in the share price; and

• are interested in exposure to US debt markets as part of a diversified portfolio.

Product availability The Fund is available to all investors with at least basic investment knowledge, through a wide range of distribution channels, with or without the need for advice.

Terms to understand

derivatives: Financial instruments whose value is linked to one or more rates, indexes, share prices or other values.

bonds: Securities that represent an obligation to repay a debt, along with interest.

efficient portfolio management: A strategy aimed at reducing risk, lowering costs or generating additional capital or income for the Fund through the use of derivatives. These strategies must align with the Funds risk profile.

Depositary

The Bank Of New York Mellon SA/NV

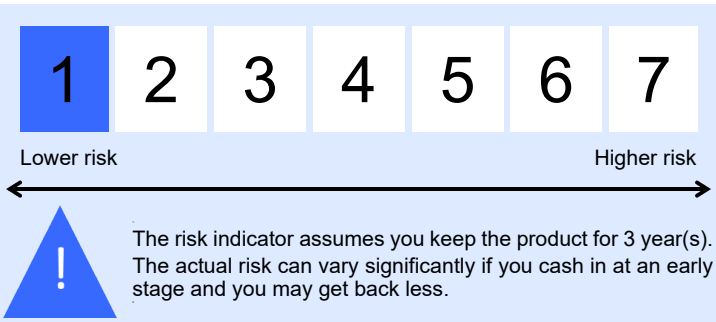
What are the risks and what could I get in return?

Risk Indicator



The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact the capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payment in a different currency, so that the final return you get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Due to effects of unusual market conditions, other risks could be triggered, such as:

- Credit risk
- Counterparty risk

Please refer to the prospectus for more detail.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 3 years

Example Investment: 200000 MXN

Scenarios	Returns	If you exit after 1 year	If you exit after 3 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.	-	-
Stress	What you might get back after costs	190 440 MXN	194 990 MXN
Stress	Average return each year	-4.78%	-0.84%
Unfavourable	What you might get back after costs	208 540 MXN	217 950 MXN
Unfavourable	Average return each year	4.27%	2.91%
Moderate	What you might get back after costs	216 240 MXN	249 560 MXN
Moderate	Average return each year	8.12%	7.66%
Favourable	What you might get back after costs	224 770 MXN	274 540 MXN
Favourable	Average return each year	12.39%	11.14%

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between December 2024 and December 2025.

Unfavourable scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between December 2024 and December 2025.

Favourable scenario: This type of scenario occurred for an investment using the benchmark as stated in the prospectus between July 2022 and July 2025.

What happens if Franklin Templeton International Services S.à r.l. is unable to pay out?

Franklin Templeton International Services S.à r.l. ("FTIS") is the management company of the Fund, but the assets are held separately from FTIS by the depositary. The Bank Of New York Mellon SA/NV, Dublin Branch, The Shipping Office, Sir John Rogerson's Quay, Dublin 2, Ireland, as the appointed depositary of the Fund, is liable to the Fund or its shareholders for any loss of financial instruments held in custody by it or its delegates (cash could however be lost in case of default of the depositary or its delegates).

There is no compensation or guarantee scheme protecting you from a default of the Fund's depositary.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- MXN 200 000 is invested

Costs over Time	If you exit after 1 year	If you exit after 3 years
Total costs	449 MXN	1 564 MXN
Annual cost impact (*)	0.2%	0.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.9% before costs and 7.7% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Please note that the figures shown here do not include any additional fees that may be charged by your distributor, advisor or any insurance wrapper in which the fund may be placed.

How long should I hold it and can I take money out early?

Recommended holding period: 3 year(s)

This Fund has no minimum required holding period. We consider that the 3 year recommended holding period is appropriate because the Fund is designed for long-term investment. You may sell your shares on any dealing day. The value of your investments may go down as well as up irrespective of the period you are holding your investments, depending on such factors as the performance of the Fund, movements in stock and bond prices, and conditions in financial markets generally. Please contact your broker, financial adviser or distributor for information on any costs and charges relating to the sale of the shares.

How can I complain?

Investors who would like to receive the procedures relating to complaints handling or wish to make a complaint about the Fund, the operation of FTIS or the person advising on or selling the Fund, should go on the website www.franklintempleton.lu, contact Franklin Templeton International Services, S.à r.l., 8A, rue Albert Borschette L-1246 Luxembourg, or send an e-mail to the client service department at etfteamta@statestreet.com & kure_transaction_monitoring_client_communication@statestreet.com.
